Company Portfolio

BLOCKLIZ

TABLE OF CONTENTS

1.1. Introduction to Company

Welcome to our blockchain development company portfolio. We are a team of experienced developers and consultants who specialize in blockchain technology. Our goal is to provide innovative solutions that leverage the power of blockchain to transform industries and improve people's lives.

Our company was founded on the belief that blockchain has the potential to disrupt traditional business models and create new opportunities for growth and innovation. We have worked on a variety of projects, from creating customized blockchain solutions for businesses to developing decentralized applications that bring blockchain technology to the masses.

At our core, we are passionate about blockchain technology and its potential to revolutionize the way we live and work. We are dedicated to staying at the forefront of this rapidly evolving industry, constantly learning and adapting to new technologies and best practices.

Thank you for considering our company for your blockchain development needs. We look forward to the opportunity to work with you and help you achieve your goals.

1.2. Business Description

Our blockchain development company is a leader in the field of blockchain technology, providing a range of services to businesses and organizations around the world. We specialize in developing customized blockchain solutions that address the unique needs and challenges of our clients. In addition to blockchain development, we also provide web, mobile, and web3 development services.

Our team of experienced developers and consultants has a deep understanding of blockchain technology and its potential to transform industries. We have worked on projects in a variety of sectors, including finance, healthcare, logistics, and more. We are committed to staying up-to-date with the latest advancements in blockchain technology and leveraging this knowledge to help our clients succeed.

Our web development services include designing and developing websites, web applications, and e-commerce solutions. We use the latest web technologies to build fast, responsive, and secure websites that deliver a seamless user experience. Whether you need a simple website or a complex web application, we have the expertise to deliver a solution that meets your needs.

Our mobile development services include developing native and hybrid mobile applications for iOS and Android platforms. We use the latest mobile technologies to build mobile applications that are fast,

BLOCKLIZ

reliable, and easy to use. Whether you need a mobile application for your business or a consumer-facing mobile app, we have the expertise to deliver a solution that meets your needs.

Our web3 development services include building decentralized applications (dApps) that run on blockchain networks such as Ethereum. We have expertise in developing smart contracts, building decentralized exchanges, and integrating with various blockchain protocols. Whether you are looking to build a new dApp or integrate blockchain technology into your existing product, we have the expertise to deliver a solution that meets your needs.

At our core, we are driven by a passion for innovation and a commitment to excellence. We are dedicated to delivering high-quality solutions that meet the needs of our clients and exceed their expectations. If you are looking for a reliable and experienced partner in the world of blockchain technology and beyond, look no further than our company.
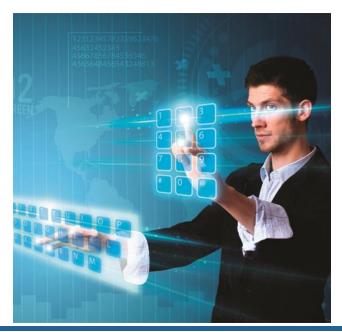

1.3. Mission Statement

Our mission is to be a leader in the development of innovative solutions that leverage blockchain, web3, mobile, and software technologies to transform industries and improve people's lives. We are dedicated to delivering high-quality solutions that meet the unique needs of our clients and exceed their expectations.

We believe that these technologies have the potential to revolutionize the way we live and work. Our goal is to help our clients leverage these technologies to create new opportunities for growth and innovation. We are committed to staying at the forefront of these rapidly evolving industries, constantly learning and adapting to new technologies and best practices.

At our core, we are driven by a passion for innovation, excellence, and social responsibility. We are dedicated to using our expertise and resources to make a positive impact on society and to promote the widespread adoption of these technologies.

We offer a range of services, including blockchain development, web3 development, mobile development, software development, and website development. Our team of experienced developers and consultants has a deep understanding of these technologies and the ability to create customized solutions that meet our clients' unique needs.

We strive to create a workplace that fosters creativity, collaboration, and continuous learning. We are committed to attracting and retaining the best talent in the industry and to providing a supportive and inclusive environment that empowers our team members to achieve their full potential.

In all that we do, we are guided by our core values of integrity, innovation, excellence, and social responsibility. We are committed to building long-term relationships with our clients and to being a trusted partner in their success.

BLOCKLIZ

1.4. Business Growth Opportunities

As an emerging blockchain development company that offers a range of services including web3, mobile, software, and website development, we are well-positioned to capitalize on several business growth opportunities. Here are some possibilities:

1. Expand our client base: We can leverage our existing reputation and expertise to explore new markets and regions and expand our client base. This can be achieved through targeted marketing and outreach campaigns, attending industry events and conferences, and networking with potential clients and partners.
2. Build strategic partnerships: We can establish strategic partnerships with other companies in the blockchain ecosystem, such as exchanges, wallets, and other service providers. This can help us expand our reach and offer more comprehensive solutions to our clients.
3. Invest in research and development: We can invest in research and development to stay at the forefront of the latest trends and technologies in the blockchain industry. This can help us develop innovative solutions that differentiate us from our competitors and provide more value to our clients.
4. Explore new revenue streams: We can explore new revenue streams, such as offering subscription-based services, creating and selling our own blockchain-based products, or partnering with other companies to develop joint solutions.
5. By capitalizing on these business growth opportunities, we can continue to build on our success as a leading blockchain development company and deliver even more value to our clients.

MOVE FAST AND INNOVATE

"Move fast and break things" is a mantra often associated with the tech industry, and it reflects the need for innovation, risk-taking, and a willingness to experiment and learn from failure. As a blockchain development company that offers a range of services including web3, mobile, software, and website development, we understand the importance of moving fast to keep up with the rapidly evolving landscape of these industries. However, we also recognize that our work involves handling sensitive data and complex technologies, which requires a careful and measured approach to ensure the highest quality and security of our solutions. Therefore, while we embrace a culture of innovation and agility, we also prioritize the importance of thorough testing, security measures, and ongoing maintenance to ensure that our solutions deliver the highest level of value and reliability to our clients.

BLOCKLIZ

2. DEVELOPMENT SERVICES

2.1. Smart Contract Development

Smart contract development is a critical aspect of blockchain development, as it enables the execution of decentralized applications (dApps) and the automation of transactions on the blockchain. At our blockchain development company, we offer smart contract development services for various blockchain platforms, including Ethereum, Polkadot, Binance Smart Chain, and more.

Our smart contract development services include designing and developing custom smart contracts that meet our clients' specific needs. We have a team of experienced developers who specialize in smart contract development and have a deep understanding of the complexities involved in developing secure and reliable smart contracts.

In addition, we also offer smart contract integration services, which involve integrating smart contracts with other blockchain applications, such as decentralized exchanges (DEXs), lending platforms, and more. We can also assist our clients in developing smart contract-based decentralized applications (dApps) on various blockchain platforms.

2.2. Blockchain Development

Blockchain development refers to the process of designing, building, and deploying blockchain-based applications, platforms, and solutions. Blockchain is a decentralized, distributed ledger technology that enables secure, transparent, and tamper-proof transactions without the need for intermediaries or central authorities.

At our blockchain development company, we offer a wide range of blockchain development services, including smart contract development, decentralized application (dApp) development, cryptocurrency development, private blockchain development, and more.

Our team of experienced blockchain developers has a deep understanding of the complexities of blockchain technology and can provide expert guidance on everything from architecture design to deployment and maintenance. We use the latest tools and technologies to develop scalable and secure blockchain solutions that meet our clients' specific needs and requirements.

2.3. Blockchain Consulting and Advisory Services

At our blockchain development company, we offer a comprehensive range of blockchain consulting and advisory services to help our clients understand the potential applications of blockchain technology and identify opportunities for innovation and growth. Our experienced blockchain consultants work closely with our clients to develop a comprehensive blockchain strategy that aligns with their business goals and objectives. We provide expert guidance on everything from use case identification to technology selection and implementation.

We also help our clients identify areas where blockchain technology can improve operational efficiency and reduce costs by analyzing existing business processes and identifying opportunities to streamline operations. Our team performs thorough security and risk assessments to identify potential vulnerabilities in our clients' blockchain solutions and recommend best practices to implement robust security measures to mitigate risks.

At our blockchain development company, we are committed to delivering innovative and effective blockchain solutions that help our clients achieve their business goals. Our blockchain consulting and

BLOCKLIZ

advisory services are designed to help our clients leverage the benefits of blockchain technology and stay ahead of the competition.

2.4. Website/ Full Stack Development

Our company offers website and full stack development services that are designed to help our clients establish a strong online presence and achieve their digital goals. We have a team of experienced web developers who use the latest technologies and tools to create custom websites and web applications that are responsive, user-friendly, and optimized for search engine rankings. We offer comprehensive website development services, including design, development, optimization, and maintenance. Our full stack development services cover both front-end and back-end development, which enables us to create web applications that deliver comprehensive solutions for our clients.

Our website development services start with a thorough understanding of our clients' business objectives, brand identity, and target audience. We then create customized website designs that reflect our clients' branding, messaging, and business objectives while delivering exceptional user experiences. Our web development team ensures that each website we develop is responsive, user-friendly, and optimized for search engine rankings. We also offer website maintenance services to ensure that our clients' websites are up-to-date and functioning properly.

Our full stack development services cover both front-end and back-end development, which means we can create custom web applications that deliver comprehensive solutions for our clients. We use a variety of programming languages, frameworks, and tools to create scalable, secure, and functional web applications that meet our clients' specific needs. Our team works closely with our clients to ensure that their web applications are robust, scalable, and provide exceptional user experiences. We are dedicated to delivering high-quality website and full stack development solutions that help our clients achieve their online goals and stay ahead of the competition.

2.5. Mobile App Development

Our company offers mobile app development services to help our clients reach their audience through mobile devices. We understand the importance of mobile apps in today's digital landscape, and we strive to create apps that deliver exceptional user experiences while meeting our clients' specific needs. Our mobile app development services cover both iOS and Android platforms, and we use the latest technologies and tools to create high-quality, scalable, and secure mobile apps.

Our mobile app development process starts with a comprehensive understanding of our clients' business objectives and target audience. We work closely with our clients to create customized app designs that reflect their branding, messaging, and business objectives while providing exceptional user experiences. Our mobile app development team uses a variety of programming languages, frameworks, and tools to create robust, scalable, and secure mobile apps that meet our clients' specific needs.

We also offer mobile app maintenance services to ensure that our clients' apps are up-to-date and functioning properly. Our mobile app development team stays up-to-date with the latest mobile app trends and technologies to ensure that our clients' apps are on the cutting-edge of mobile app development. We are dedicated to delivering high-quality mobile app development solutions that help our clients achieve their digital goals and stay ahead of the competition.

3. PREVIOUS PROJECTS

In this section, we have listed some of the previous projects we have worked upon and the experience we have.

3.1. ICO Platform

We developed an innovative ICO platform for a startup, providing them with a robust and secure platform for launching their Initial Coin Offerings (ICO). Our team of experienced blockchain developers and experts utilized cutting-edge blockchain technology and smart contract programming to create a highly efficient and secure platform for conducting ICOs.

Our ICO platform provides a user-friendly interface for investors and a comprehensive dashboard for project owners to manage their fundraising campaigns, track contributions, and distribute tokens. The platform is highly scalable and can accommodate large volumes of transactions with high throughput and low latency. We worked closely with our client to ensure that their ICO platform met all regulatory requirements and complied with industry standards for security and transparency. Our team also provided ongoing support and maintenance to ensure that the platform continued to function at optimal levels.

Overall, our ICO platform has been highly successful in helping our client raise capital and launch their blockchain-based projects. We are proud to have played a key role in their success and look forward to working with other blockchain companies to achieve similar results.

3.2. Centralized Exchange

When it comes to developing a centralized exchange platform, our company prides itself on our innovative and forward-thinking approach. We have worked with a variety of clients across different industries to develop customized solutions that meet their specific needs and requirements.

Our centralized exchange platform is designed to provide users with a seamless and secure trading experience. We utilize cutting-edge blockchain technology and smart contract programming to ensure that the platform is highly scalable, secure, and efficient. Our platform also includes a powerful admin dashboard that provides users with a comprehensive set of tools for managing their digital assets, transactions, and users.

One of the key features that sets our centralized exchange platform apart is our focus on user experience. We understand that in today's fast-paced digital environment, users demand a platform that is intuitive and easy to use. That's why we prioritize user experience in every aspect of our platform development, from the design of our user interface to the way we manage transactions.

Another innovative feature of our centralized exchange platform is our focus on regulatory compliance. We understand that the regulatory landscape for digital assets and cryptocurrencies is constantly evolving, and we work closely with our clients to ensure that their platform meets all necessary compliance requirements.

Overall, our centralized exchange platform is an innovative solution that leverages the latest blockchain technology to provide users with a secure, scalable, and user-friendly trading experience. We are proud to have worked with a diverse range of clients to develop customized solutions that meet their unique business needs, and we look forward to continuing to innovate and push the boundaries of what's possible in the digital asset exchange space.

BLOCKLIZ

3.3. Staking Smart Contract

Our company is also experienced in developing staking platforms, which are becoming increasingly popular among investors and blockchain enthusiasts. Staking is a process by which users hold a certain amount of digital assets in a wallet, in order to support the security and operations of a blockchain network, and in return, they receive rewards.

Our staking platform is designed to provide users with a secure and easy-to-use platform for staking their digital assets. We utilize the latest blockchain technology and smart contract programming to ensure that the platform is secure, transparent, and efficient.

One of the key features of our staking platform is our focus on usability. We understand that staking can be a complex process, and we strive to make it as simple and intuitive as possible for users. Our platform includes a user-friendly interface that allows users to easily stake their assets, track their rewards, and manage their staking portfolios.

Another important feature of our staking platform is our focus on security. We utilize the latest encryption and guards to ensure that user data and assets are always protected. Our platform also includes a range of security features, such as multi-factor authentication and withdrawal limits, to prevent unauthorized access and protect against potential hacks or breaches.

Overall, our staking platform is an innovative and user-friendly solution that leverages the latest blockchain technology to provide users with a secure and efficient platform for staking their digital assets. We are proud to have developed customized solutions for a variety of clients in different industries, and we look forward to continuing to innovate in the staking space.

3.4. Supply chain Smart Contract

At our company, we specialize in developing supply chain solutions using smart contracts on blockchain technology. Smart contracts are self-executing digital contracts that are programmed to automatically trigger actions or events based on pre-defined conditions. They offer an ideal solution for supply chain management, providing greater transparency, security, and efficiency than traditional supply chain solutions.

Our supply chain smart contracts enable stakeholders in the supply chain to easily track and verify the movement of goods and products from one point to another, providing greater transparency and reducing the risk of fraud or errors. Our platform also allows for dispute resolution, which can help streamline the entire supply chain process and improve efficiency.

One of the key advantages of our supply chain smart contracts is that they are highly customizable, allowing us to tailor our solutions to meet the specific needs of our clients. We work closely with our clients to understand their business requirements and develop customized smart contracts that address their unique supply chain challenges.

Our supply chain smart contracts are also designed to be scalable, allowing our clients to easily add new partners, suppliers, or customers to the supply chain network. This makes our platform ideal for businesses of all sizes, from small startups to large multinational corporations.

Overall, our supply chain smart contracts provide a secure, transparent, and efficient solution for supply chain management. We are proud to have developed customized solutions for a variety of clients in different industries, and we look forward to continuing to innovate in the supply chain space.

3.5. Crypto Tokens

At our company, we have extensive experience in developing crypto tokens on blockchain technology. Crypto tokens are digital assets that are issued and managed on a blockchain network, and can be used for a wide range of purposes, including fundraising, trading, and incentivizing user behavior.

Our crypto token solutions are designed to provide our clients with a comprehensive and flexible platform for managing their digital assets. We work closely with our clients to understand their business needs and goals, and develop customized solutions that meet their specific requirements.

Our platform allows clients to easily issue and manage their own crypto tokens, providing greater control and flexibility over their digital assets. We utilize the latest blockchain technology and smart contract programming to ensure that the tokens are secure, transparent, and compliant with regulatory requirements.

Our platform also includes a range of features to help clients maximize the value of their crypto tokens, including a user-friendly interface for managing token sales and distributions, and a variety of token utility functions to incentivize user engagement and behavior.

Overall, our crypto token solutions provide a secure and efficient platform for managing digital assets, and can be customized to meet the unique needs of our clients. We are proud to have worked with a variety of clients in different industries to develop customized solutions that help them achieve their business goals, and we look forward to continuing to innovate in the crypto token space.

3.6. Real time Grid Detection System

Our company specializes in developing advanced image processing and computer vision systems for a wide range of applications. Our solutions leverage the latest technology to provide high-performance, reliable, and accurate results for our clients.

One of our core offerings is real-time object detection systems, which are used in a variety of industries and applications, including autonomous driving, security and surveillance, and robotics. Our object detection systems use deep learning algorithms to analyze images and identify objects in real-time, providing precise and actionable information to operators and systems.

In addition to object detection, we also develop customized solutions for other image processing and computer vision applications, such as face recognition, optical character recognition (OCR), and medical image analysis. Our team of experts works closely with clients to understand their specific needs and requirements, and develop tailored solutions that address their unique challenges.

Overall, our image processing and computer vision systems provide our clients with innovative and efficient solutions for a wide range of applications. We are proud to have worked with a variety of clients in different industries, and we look forward to continuing to innovate and provide cutting-edge solutions in the image processing and computer vision space.

3.7. NFT Project

Our company specializes in developing NFT smart contracts, which are essential components of any NFT marketplace. Non-fungible tokens, or NFTs, are unique digital assets that are stored on a blockchain and represent ownership of a specific digital asset or piece of content. Smart contracts, on the other hand, are self-executing contracts with the terms of the agreement between buyer and seller being directly written into lines of code.

Our NFT smart contract solutions are designed to provide our clients with a secure and reliable way to manage the ownership, distribution, airdrop and transfer of NFTs. We work closely with our clients to

BLOCKLIZ

understand their unique needs and requirements, and develop customized solutions that meet their specific goals.

Our team of experts has extensive experience in blockchain technology, ensuring that our NFT smart contracts are built using the latest techniques and best practices. This guarantees that transactions are secure and transparent, and that our clients can trust in the integrity of the NFT ecosystem.

In addition to developing NFT smart contracts, we also provide a range of services to support our clients in creating and monetizing NFTs. This includes assistance with token creation and distribution, as well as guidance on how to effectively market and promote NFTs to potential buyers.

Overall, our NFT smart contract solutions provide a powerful and flexible framework for clients to manage their digital assets and create new revenue streams. We are proud to have worked with clients in various industries to develop custom solutions that meet their unique needs, and we look forward to continuing to innovate in the NFT space.

3.8. NFT Marketplace

As a leading blockchain development company, we specialize in developing custom NFT marketplaces for clients in a wide range of industries. Non-fungible tokens, or NFTs, are unique digital assets that are stored on a blockchain and represent ownership of a specific digital asset or piece of content.

Our NFT marketplace solutions are designed to provide our clients with a secure and user-friendly platform for buying, selling, and trading NFTs. We work closely with our clients to understand their unique needs and requirements, and develop customized solutions that meet their specific goals.

Our team of experts has extensive experience in blockchain technology, ensuring that our NFT marketplaces are built using the latest techniques and best practices. This guarantees that transactions are secure and transparent, and that our clients can trust in the integrity of the marketplace.

In addition to developing NFT marketplaces, we also provide a range of services to support our clients in creating and monetizing NFTs. This includes assistance with token creation and distribution, as well as guidance on how to effectively market and promote NFTs to potential buyers.

Overall, our NFT marketplace solutions provide a powerful platform for clients to monetize their digital assets and create new revenue streams. We are proud to have worked with clients in various industries to develop custom solutions that meet their unique needs, and we look forward to continuing to innovate in the NFT space.

3.9. Crypto Payment Gateway

As a leading blockchain development company, we are proud to offer our clients custom crypto payment gateway solutions that are designed to help them accept cryptocurrencies as a form of payment. Cryptocurrencies are becoming increasingly popular among consumers and businesses alike, and our solutions are designed to meet the growing demand for a secure and easy-to-use platform for accepting them.

Our crypto payment gateway solutions are tailored to the unique needs and requirements of each of our clients. We work closely with them to understand their business and target market, and develop customized solutions that are easy to integrate and use.

Our team of experts has extensive experience in blockchain technology, ensuring that our crypto payment gateways are built using the latest techniques and best practices. This guarantees that transactions are secure and transparent, and that our clients can trust in the integrity of the payment gateway.

In addition to developing crypto payment gateways, we also provide a range of services to support our clients in using and managing cryptocurrencies. This includes assistance with wallet setup and management, as well as guidance on how to effectively market and promote the acceptance of cryptocurrencies to customers.

Overall, our crypto payment gateway solutions provide a powerful and convenient way for businesses and organizations to stay ahead of the curve and accept cryptocurrencies as a form of payment. We are proud to have worked with clients in various industries to develop custom solutions that meet their unique needs, and we look forward to continuing to innovate in the crypto space.

3.10. Wallet generation system

In the ever-evolving world of blockchain technology, our company stands out as a leading provider of custom wallet generation systems. We understand the importance of security and ease-of-use when it comes to managing cryptocurrencies, and our solutions are designed with these principles in mind.

Our custom wallet generation systems provide businesses and organizations with a powerful tool for managing cryptocurrencies securely and efficiently. We work closely with our clients to understand their unique needs and requirements, and develop customized solutions that meet their specific goals.

Our team of experts has extensive experience in blockchain technology, ensuring that our wallet generation systems are built using the latest techniques and best practices. This guarantees that the wallets we generate are secure, transparent, and user-friendly.

In addition to developing wallet generation systems, we also provide a range of services to support our clients in using and managing cryptocurrencies. This includes assistance with wallet setup and management, as well as guidance on how to effectively market and promote the use of wallets to customers.

Overall, our custom wallet generation systems provide a powerful and convenient way for businesses and organizations to securely manage cryptocurrencies. We are proud to have worked with clients in various industries to develop custom solutions that meet their unique needs, and we look forward to continuing to innovate in the blockchain space.

We also provide support for custodian wallet generation systems that will help in storing the mnemonics of the users in a secure way.

3.11. Cross border Truck Tracking Service

Our company is proud to offer a cutting-edge cross-border truck tracking service, powered by a FastAPI based microservice. This microservice is designed to receive, parse, and portray cargo release status for cross-border trucking, providing businesses with real-time visibility into their shipments as they travel across borders.

Our cross-border truck tracking service is equipped with a range of features, including in-memory caching, a refresh algorithm, and various security features to ensure the safety and confidentiality of our customers' data. These features are integrated into a customer dashboard and API's for B2B applications, providing easy access to the information businesses need to make informed decisions about their shipments.

Our team of experts has extensive experience in developing cross-border logistics solutions, and our cross-border truck tracking service is no exception. We have designed and implemented this service to be fast, reliable, and easy-to-use, ensuring that our clients can manage their shipments with confidence.

Overall, our cross-border truck tracking service is a powerful tool for businesses looking to optimize their logistics operations and stay ahead of the competition. Whether you are a small business or a large enterprise, our microservice is designed to meet your unique needs, providing you with real-time visibility into your shipments and the information you need to make informed decisions.

3.12. Facebook Chatbot

Our company is proud to have designed and deployed a cutting-edge Facebook chatbot for a startup using Flask and GraphAPI. This chatbot is designed to provide businesses with a powerful tool for engaging with customers on Facebook Messenger, allowing them to respond to inquiries, provide support, and drive sales.

Our team of experts has extensive experience in developing chatbots for a range of applications, and our Facebook chatbot is no exception. We have designed and deployed this chatbot using Flask and GraphAPI, ensuring that it is fast, reliable, and easy to use.

The chatbot is equipped with a range of features, including natural language processing, which allows it to understand and respond to user inquiries in real-time. It also integrates with a range of third-party applications, including customer relationship management systems, allowing businesses to manage their interactions with customers seamlessly.

Overall, our Facebook chatbot is a powerful tool for businesses looking to engage with customers on Facebook Messenger. Whether you are a small startup or a large enterprise, our chatbot is designed to meet your unique needs, providing you with a powerful tool for driving engagement, providing support, and boosting sales.

3.13. TrackCovid

Our company is proud to have developed a cutting-edge live Covid-19 tracker, equipped with an integrated chatbot and ways to upskill during this time. This tracker is designed to provide individuals with real-time information about the Covid-19 pandemic, helping them stay informed and make informed decisions.Our live Covid-19 tracker is equipped with a range of features, including real-time data on the number of cases, recoveries, and fatalities. It also includes an integrated chatbot, allowing users to ask questions and receive accurate information about the pandemic in real-time.

In addition to providing real-time Covid-19 data, our tracker also includes ways to upskill during this time. This includes resources for online learning, tips for working remotely, and ways to stay productive and motivated during the pandemic.

Our team of experts has extensive experience in developing innovative solutions for complex problems, and our live Covid-19 tracker is no exception. We have designed and developed this tracker to be fast, reliable, and easy to use, ensuring that individuals have access to the information they need to stay informed and make informed decisions.

Overall, our live Covid-19 tracker is a powerful tool for individuals looking to stay informed about the pandemic and upskill during this time. Whether you are looking to stay up-to-date on the latest Covid-19 data or looking for ways to improve your skills, our tracker is designed to meet your unique needs.

4. ABOUT US

Amitesh Garg

I am a professional Blockchain Full Stack Developer with around 5+ years in the software development industry. I have immense experience in the field of blockchain and have also worked in artificial intelligence projects.

My aim is to build softwares to ease the development lifecycle and get the products out in the market bug free and fast with state-of-the-art features.

Muhammad Taufique

I am a blockchain consultant and have a strong background in blockchain development, having launched over 25 successful projects for international companies and currently running a blockchain development firm too in the United States.

As a blockchain consultant, I have a deep understanding of the potential of this transformative technology and is dedicated to using it to improve people's lives. With my services, I am on a mission to make internet access more accessible and reliable for everyone.
